on. All necessary for indirectioning and we Diona su or to law Misser, serial doce fore the 11th day of Documber, 1876, and a date new payable to Marina and Bouch, present proprinters:

T. M. Alexander, just in from the Peck mine gives us the following information: top of the ridge's short distance to the north of Mr. Cor's mine. Once on the ridge the will have no trouble in going anywhere in the extensive pinery that covers the mountains for several miles. The work at the Peck mine is being pushed vigorously, they

are now down seventy feet below the tunnel, or 220 feet from the surface and are still sinking although they are obliged to hoist from 1,600 to 2,000 gallons of water every twenty four hours. Contrary to all precedent in this district, and contrary to the expectations of the owners the ore in this mine continues to be free below the water level, and is of exactly the same character as that found near the surface. Every one acquainted with mining in this region expected they would strike sulphurets as soon as the water level was reached, but the chlorides continue in a strong pay streak, full three feet wide, all of which pays on an average over four hundred dollars a ton. They are assorting now have on the dump five or six hundred tons of second class ore that assays about \$200, which will not pay to transport, and will have to be worked on the ground some time in the future when a mill shall be erected there. At a depth of some thirty or seventy feet, it will prove to be the best mining property of its magnitude in America, if not the best in the world. The Peck in Yavapai and the Silver King in Pinal circumstances of a want of transportation two mining plants now being worked here

LETTER FROM PHOENIX.

Phoenix, Dec. 28 I876. early in the day that a Grand Christmas Ball was to take place, that night, in the hall of the C. & A. Stage Co., secured a ticket, knowing well from previous experience that the showing was good to spend a Merry Christmas, donned my "store clothes" and at 9 P. M. "sharp" put in appearance at the hall and after having my ticket carefully compared with the list of invitations and punched, countersigned, numbered, etc., etc., all of which was necessary, as the ball managers said the party was a "way up affair." I went or feathered in and found I was No. 71 and that seventy-one couples was "thar." Yavapai's sons to become distinguished and already distinguished were quite numerous on the floor, amongst whom was Honorables J. P. Bull, from Mohave, John Howard, J. H. Marion, Hugo Richards, S. C. Miller, Geo. D. Kendall, A. L. Moeler, and L. A. Stevens. A sprinkling of the "solid" men of Maricopa on hand, viz: Honorables John Smith, King Woolsey, C. T. Hayden, C. H. Gray and J. M. Cotton. The toilettes of the ladies were varied and many of the latest modes, and very beautiful and expressive. The Misses S- of Prescott looked charming and were much admired. Mrs. D- of Hayden's Ferry was superbly attired, Elegant toilettes were worn by Mrs. John Smith, Mrs. G. H. Oury, Mrs. Judge Hayden, Mrs. Dr. Pierson, Mrs. Joseph Phy, Mrs. C. H. Gray, Mrs. John Montgomery, Mrs. Orme, Misses Tuckers, Miss Flora Murray, Miss Grant, Miss Roberts and many others whose names 1 could not learn. Not being a "dancist" I could not determine who was the best lady dancer. They all looked pretty and did pretty. It was generally conceded that Messrs. Moeler, Thomas, Richards, Hussey and Larkin were au fait in dancing. J. D. Monihon, (a bachelor pro tem) acted with his usual zeal as floor manager and musical director and was ably assisted by Mr. Geo. Buck. The music was furnished by the Phoenix String Band. The supper was furnished by mine host, Hayes, of the Phoenix Hotel, and was something to remember and under the able management of Messrs. Larkin, Kirtland and Shaw, all passed of merry as a marriage bell and the boys went home with the girls in the morning at 5. The Yavapai's so say we all. More anon.

under his direction. We wish him success, return.

TINA SMALL Dr. D. L. Mag-uder, who has held the position of Medical Director of the Military Department of Arizona for a long time took his departure yesterday for St. Louis, Missouri. Prescott and Fort Whipple will miss the Dr., especially, on account of his about the age of eighteen. Time was young also but weighed something over two hun-The company is now engaged in building a dred pounds; and to use the Dr's own lanroad, from the timber on Del Pasco ridge to guage, possessed a noble physique, also was the mine. They have twenty men at mosk broad at the base, surmounted by a fine on the road and have it this had from the superstructure, in short she would ordinarimine to within three quarters of a mile of lily measure about five feet around the walst, but on a particular Sunday morning when the future Medical Director was to escut her to church, he suspected that her mother and sister had assisted her in reducing her circumference. They proceeded to the church, the day was warm, and in the middle of the sermon Tina Small swooned away, and fell upon the floor; here was a predicament, she was too heavy to carry, he was too much frightened to call for assistance; the minister stopped his discourse, and all eyes were turned upon the nufertunate girl and her escort. He saw that something must be done, so he undertook to take he up in his arms and carry her out into the fresh air; this was soon found to be an impossibility, Tina was too heavy, so he partly dragged her until some one sufficiently self-possessed came to his assistance and finally they deposited their precious burden on the front steps of the the ore and sending none to the mill that church. Now came the most critical point will not go over six hundred dollars. The in the game, he had not yet read medicine nor studied anatomy, and what to do in such a case as this, he had not the least from his forehead which, without taking time to search in his pockets for a handkerforty feet further, if the water will permit chief, he was endeavoring to keep free by them to reach that distance down, they pro- an almost constant application of his open pose to drift both ways and stope up to the hand and coat sleeve, which were completetunnel. Should this mine continue to hold ly saturated, as were the rest of his clothes, its own in going down, as it has for the last he was emphatically "in a sweat." His point on the S. P. R.
